

EFI® Fiery® Colour Server for the DocuColor® 5000AP Digital Press

Improve productivity, save time and effort.

The EFI Fiery Colour Server handles complex print jobs with ease, and is designed to boost productivity, cut waste, reduce repetitive tasks, and meet the needs of virtually any print environment.

High performance assured.

This Fiery Colour Server features EFI's newest version, System 8 software, giving it exceptional flexibility to expand. Workflow control, comprehensive colour management, outstanding Variable Data Printing (VDP) support, and a wide variety of powerful utilities all come standard. Powerful productivity-driven hardware lets operators work on two jobs at once. This RIP1/Print2 technology enables the Fiery Server to start RIPping one file while printing the previous file, thus reducing bottlenecks and delivering output more quickly to the print engine.

Consistent colour across the board.

You'll profit from ColorWise®, EFI's in-RIP colour-management technology, and its standard-setting colour controls. This system delivers expert controls and great colour, right out of the box. It also integrates seamlessly with the optional Fiery Graphic Arts Package Premium Edition which combines expert tools for managing colour, proofing, and controlling workflow.

Making printing easier than ever.

This Fiery Colour Server features EFI's renowned Command WorkStation®, available in both Windows® and Macintosh® editions, for unmatched control of digital print jobs. This software supports multiple operators simultaneously through a unified workspace, linear workflows, and WYSIWYG interfaces, helping to streamline operations for users with varying levels of expertise.

Features that automate workflow.

With this Fiery Server you'll have Hot Folders and Virtual Printers that reduce repetitive tasks, waste, and errors. EFI Impose™, a WYSIWYG imposition application, provides fast, accurate processing of the most complex booklet, n-up, and gang-up routines.

Make Variable Data Printing a snap.

Industry-leading technology enables this colour server to process VDP files and drive print engines at their full rated speed. Master data is RIPped only once and can be stored and re-used. Users can choose any authoring tool, work with familiar databases, and be assured of compatibility with a wide array of VDP languages, as well as proprietary languages.

Prioritise, streamline, and boost productivity.

The advanced queue management capabilities in the Fiery give the power to re-prioritise last-minute jobs with little interruption and downtime, enhancing productivity and improving profitability.

The optional Compose provides make-ready tools and an advanced WYSIWYG user interface to improve document verification, speed up composition, and enable less-experienced operators to perform complex document functions.

EFI® Fiery® Colour Server for the DocuColor® 5000AP Digital Press

Hardware Specifications*

- Intel Core2 Duo (2 x 2.66 GHz) CPU
- 1 GB DDR SDRAM (up to 2 GB with upgrade)
- 160 GB HD
- DVD/CD-RW
- ES-1000 Spectrophotometer
- Fiery® Advanced Controller interface kit: keyboard, 15-inch flat panel display, mouse, and integrated workstation

Image Quality and Colour Management

- ColorWise® tools deliver expert control and great colour
- Accurate and consistent Spot-On colour matching
- Graphic Arts Package provides comprehensive colour-management tools
- Auto Trapping feature automatically corrects mis-registration for composite or separated documents
- Optional Fiery®-based Graphic Arts Package Premium Edition utilises the most advanced tools for colour proofing and editing

Workflow

- Command Workstation® v4.5 for local and remote workflow control
- EFI® Impose™ for WYSIWYG imposition solution
- Hot Folder support for Windows® and Macintosh® OS X
- Integrated Hot Folder filters support most file formats typical in graphic arts environments
- EFI® Driver is a user-friendly interface designed to simplify printing
- Mixed Media offers a more robust architecture, a single consistent workflow for all jobs, and a comprehensive integration with other features like VDP and EFI® Impose™
- MS Office Filters for Hot Folders automate the submission of office environment jobs

Client and Remote Support/Drivers

- Microsoft® Windows® XPe
- EFI® System 8 Release 2
- EFI® Impose™, Fiery® Edition 2.7
- Secure Erase
- Fiery® Spot-On with Substitute Colours
- Mixed Media
- Insert Tabs
- EFI® Driver
- Command WorkStation®, Windows® Edition
- Command WorkStation®, Macintosh® Edition
- WebTools™
- Hot Folders and Virtual Printers

Security

- 3-Level Access Control for Command WorkStation®
- Secure Job Log
- User Authentication
- Back Up and Restore
- Secure Erase
- LDAP Authentication
- Port Blocking
- IP Filtering
- SNMP v3
- SNTP
- MAC® Filtering
- Removable Hard Disk Drive (RHDD)

Variable Printing Format Support

- Xerox® VIPP® (purchasable option)
- Fiery® FreeForm™
- PPML

Network Environments/Protocols

- Simultaneous Autoswitching Protocols
- EtherTalk II
- TCP/IP
- Ipv6 support
- LDAP Support
 - Exchange, Novell®, Domino LDAPv3/ RFC2251
 - Email address access and authentication
 - User password validation

- Certificate Management
 - SSL/TLS
 - X509 Support
- IP Sec Support
- Autosensing Ports
- RJ45 for on-board 10/100/1000
- Base-T and 10/100 Base-T
- Automatic IP configuration
- SNMP Printing Support
- AppleTalk®
- Mac® Bonjour
- SMB (peer-to-peer)
- LPD

Dimensions/Weight

- Height 603 mm x Width 603 mm x Depth 451 mm
- Weight: 28.4 kg

Options

- Fiery® Graphics Art Package Premium Edition
- EFI® Compose, Fiery® Edition v2.0
- Color Profiler Suite v2.0
- Removable Hard Disk Drive (RHDD)
- 1 GB of memory

Power

- Autoswitching 90-35/180-265 VAC, 47 to 63Hz
- 6A @ 115 VAC; 3A @ 230 VAC

Regulatory/Agency Approvals

- CE Mark, CSA, TUV/GS, UL, CB Scheme
- EMC
 - EN55022 Part B (CE marked)
 - FCC Class B
 - VCCI II

*Minimum System Configuration
