

## Xerox Product Response to US-CERT® Technical Cyber Security Alert TA06-220A: Microsoft Products Contain Multiple Vulnerabilities (MS06-040 through MS06-051)

The primary audience for this document is Xerox analysts and customers who want information regarding how Xerox products respond to [US-CERT® Technical Cyber Security Alert TA06-220A](#), issued by US-CERT® on August 8<sup>th</sup>, 2006. The following sections provide excerpts from the US-CERT® Technical Cyber Security Alert and the corresponding Xerox response.

### Background

The [United States-Computer Emergency Readiness Team](#) (US-CERT) is a partnership between the National Cyber Security Division (NCSD) at the [Department of Homeland Security](#) (DHS) and the private sector. US-CERT provides individuals and organizations with access to valuable educational resources as well as up-to-date computer security information via the [National Cyber Alert System](#).

[US-CERT® Technical Cyber Security Alert TA06-220A](#) states that Microsoft has released updates that address critical vulnerabilities. Exploitation of these vulnerabilities could allow a remote, unauthenticated attacker to execute arbitrary code or cause a denial of service on a vulnerable system.

### Xerox Product Response

The table below lists various products and their positions with respect to this vulnerability. The table will be updated with product information as it becomes available.

Product	Response to <a href="#">US-CERT® Technical Cyber Security Alert TA06-220A</a>
<b>CentreWare Network Scanning Services</b>	CentreWare Network Scanning Services is not directly affected by these vulnerabilities. Operating systems on which CentreWare Network Scanning Services reside may be affected. We recommend that our customers install the latest operating system security patches.
<b>CentreWare Network Services</b>	CentreWare Network Services is not directly affected by these vulnerabilities. Operating systems on which CentreWare Network Services reside may be affected. We recommend that our customers install the latest operating system security patches.
<b>CopyCentre 118 CopyCentre 123 CopyCentre 128 CopyCentre 133 CopyCentre M20</b>	These CopyCentre products are not Microsoft Windows-based and are not, therefore, affected by these vulnerabilities.
<b>DocuColor 2240/1632</b>	The DocuColor 2240/1632 is not Microsoft Windows-based and is not, therefore, affected by these vulnerabilities.
<b>DocuColor 3535 with EFI Network Controller</b>	DocuColor 3535 with EFI Network Controller is not Microsoft Windows-based and is not, therefore, affected by these vulnerabilities.
<b>DocuColor with EFI Splash front-ends:</b> <ul style="list-style-type: none"> <li>• <b>DocuColor 12 with G640</b></li> <li>• <b>DocuColor 3535 with G3535</b></li> </ul>	DocuColor products with EFI Splash front-ends are not Microsoft Windows-based and are not, therefore, affected by these vulnerabilities.

Product	Response to <a href="#">US-CERT® Technical Cyber Security Alert TA06-220A</a>
<b>Document Centre products (200, 300, 400 and 500 Series)</b>	Document Centre products are not Microsoft Windows-based and are not, therefore, affected by these vulnerabilities.
<b>Document Centre Xerox WIA Driver for Microsoft® Windows XP®</b>	Document Centre Xerox WIA Driver for Microsoft Windows XP is not directly affected by these vulnerabilities. Operating systems on which Document Centre Xerox WIA Driver for Microsoft Windows XP resides may be affected. We recommend that our customers install the latest operating system security patches.
<b>DocuPrint N Series products</b>	DocuPrint N Series products are not Microsoft Windows-based and are not, therefore, affected by these vulnerabilities.
<b>DocuPrint NPS/IPS Series products</b>	DocuPrint NPS/IPS Series products are Sun-based and are not, therefore, affected by these vulnerabilities.
<b>DocuSP-based products</b>	DocuSP-based products are Sun Solaris-based and are not, therefore, affected by these vulnerabilities.
<b>FaxCentre F12</b>	The FaxCentre F12 is not Microsoft Windows-based and is not, therefore, affected by these vulnerabilities.
<b>FlowPort</b>	FlowPort is not directly affected by these vulnerabilities. Operating systems on which Flowport resides may be affected. We recommend that our customers install the latest operating system security patches.

Product	Response to <a href="#">US-CERT® Technical Cyber Security Alert TA06-220A</a>
<p><b>FreeFlow™ Makeready, Process Manager, and Web Services (includes DigiPath)</b></p>	<p>FreeFlow™ Makeready, Process Manager, and Web Services (including DigiPath) are affected by a number of these vulnerabilities. We recommend that our customers install the latest "High Priority" operating system security patches using the following instructions:</p> <p><b><u>Instructions for using Windows Update on FreeFlow Makeready, Process Manager, and Web Services (includes DigiPath)</u></b></p> <ol style="list-style-type: none"> <li>1. Ensure that a TapeWare system backup exists.</li> <li>2. Create a new Microsoft System Restore point (<b>not</b> available in Windows Server 2003).               <ul style="list-style-type: none"> <li>- Select "<b>Start</b>" and go to "<b>Programs&gt;Accessories&gt;System Tools&gt;System Restore</b>".</li> <li>- Follow the instructions to create a new restore point.</li> </ul> </li> <li>3. On a weekly basis, run Windows Update:               <p>The Windows Update web site and software are maintained and updated at the discretion of Microsoft. The update process can also be affected by the operating system, version of Windows Update software currently installed on the system, and even the manner in which Windows Update is launched. As such, the Windows Update process cannot be documented in a directive manner. Instead, the following guidelines should be followed when running Windows Update:</p> <ul style="list-style-type: none"> <li>• If the Windows Update web site prompts to install a newer version of the Windows Update software, follow the on-screen installation instructions to install the new version of software.                   <p><b>NOTE: If you install a newer version of Windows Update software, you will have to run Windows update again to install the updates.</b></p> </li> <li>• When running Windows Update, always select the <b>Custom Install</b> option. This option will allow for the de-selection of unsupported components, such as Service Packs.                   <p><i>NOTE: For a current listing of the supported Service Packs and updates, please refer to the most recent <a href="#">FreeFlow™/DigiPath Microsoft Patch Summary</a>.</i></p> <p><b>NOTE: When selecting updates from "Custom Installs" ensure all unsupported service packs are removed from the list of downloads before installing the updates.</b></p> </li> <li>• Operating System and Internet Explorer Service Packs are <b>not</b> to be installed via this process unless otherwise indicated.</li> </ul> </li> <li>4. Run Windows Update. The application can be launched from either of the following interfaces:               <ul style="list-style-type: none"> <li>• The Windows Start menu (select [Windows Update])</li> <li>• Internet Explorer (select [Tools: Windows Update])</li> </ul> </li> </ol>
<p><b>FreeFlow™ Output Manager FreeFlow™ Print Manager FreeFlow™ SMARTsend™</b></p>	<p>These FreeFlow products are not directly affected by these vulnerabilities. Operating systems on which they reside may be affected. We recommend that our customers install the latest operating system security patches.</p>
<p><b>Phaser products</b></p>	<p>Phaser products are not Microsoft Windows-based and are not, therefore, affected by these vulnerabilities.</p>
