

## What does the Xerox Pre-owned Equipment certification process offer to its customers?

**QUALITY  
PRE-OWNED  
EQUIPMENT**

### The 10 point quality process...

- ▶ Remove all covers and repaint to Xerox specifications
- ▶ Remove and rebuild the fuser assembly, developer housings, and all paper handling transports
- ▶ Pressure clean the Chassis, electrical harnesses and remaining attached assemblies and parts
- ▶ Inspect all parts, harnesses, and electrical connectors for excessive wear and /or damage
- ▶ Replace or repair all excessively worn or damaged parts
- ▶ 100% replacement of all drive belts and filters
- ▶ Each system is configured to customer order and adjusted to Xerox specifications.
- ▶ Each system is stress tested by running a minimum of 10K prints with zero paper jams and/or job interrupt errors using the latest field release software.
- ▶ Final inspection and quality approval sign off is performed by our Lead Technician
- ▶ The System is packed per best commercial practices and shipped complete to your Xerox approved rigger

We believe that our rigorous certification process and final testing provides our customers with the highest quality, previously owned Xerox Production Printing and/or DocuTech system, and back that claim with the **Xerox Total Satisfaction Guarantee.**
