

10 Tips for a Greener Print Shop

Working together to make every print job a little more green. Here are ten tips to manage your print facility more efficiently for a “greener” world.

One

Understand your environmental impacts and set goals to reduce them.

Two

Embrace print on demand.

Three

Utilize soft proofing.

Four

Adopt latest workflow technologies.

Five

Make the most of every sheet.

Six

Know where your paper comes from and recycle the paper you use.

Seven

Reduce energy use.

Eight

Use good waste prevention and management practices.

Nine

Seek equipment designed for remanufacturing or recycling.

Ten

Ensure you're working with environmentally responsible suppliers.
