

Power to Expand

The Nuvera™ 100/120 Digital Production System
with the New Basic Finisher Module Plus...

The new Basic Finisher Module Plus, adding more muscle to the production and customization of your Nuvera™ 100/120 Digital Production System.

...Impressive Image Quality, Speed
and Continuing Customization.

Continuous Run with Multiple Finishers Gives Productivity a Boost

The new Basic Finisher Module Plus revs up productivity with its new side exit design. When positioned alongside the standard Basic Finisher Module, both modules work in harmony enabling unload-while-run finishing capability. When one Basic Finisher Module is full, the Nuvera™ Digital Production System automatically switches to the other, so operators can unload while production keeps rolling. This greater throughput without interruption complements current productive reload-while-run innovations in paper handling and toner/developer replacement. While other machines may need to stop, the Nuvera™ 100/120 Digital Production System keeps running until the job is done.

Finishing Alternatives Provide the Power to Expand

The Basic Finisher Module Plus now gives customers even more freedom of choice for inline finishing alternatives. The Basic Finisher Module Plus now offers an inline stapling and stacking solution for production environments which also demand unique inline finishing alternatives, such as Booklet Makers, Perfect Binders, Punchers, Thermal Binders, Spiral Binding and more. The power and creativity continues when coupled with the Insertion Module, which allows automatic insertion of pre-printed covers, slipsheets and various stocks within your job streams.

Heavyweight Handler Manages New Expanded Media Range

Now both the Basic Finisher Module Plus and standard Basic Finisher Module have added capability to handle the Nuvera™ 100/120 Digital Production System expanded paper weights up to 250 gsm. The Basic Finisher Module Plus maintains the same general paper capacity as our Basic Finisher Module, with its ability to handle all types of media including coated paper, bond, bristol, cover, index, transparencies, labels, tabs, preprinted forms, etc.

Built to perform. Custom designed by you.

Basic Finisher Module Plus*

Let the Nuvera™ 100/120 Digital Production System and the new Basic Finisher Module Plus take you down the road to productivity in whichever configuration fits your printing and finishing style. Your options are nearly endless, from high capacity sheet feeding to color page insertion to unique finishing alternatives. As your business needs grow, so can the power of your Nuvera™ 100/120 Digital Production System.
