

XEROX DOCUTECH 2000 SERIES

## M.I.S. Print for DocuSP

**Y**our company has always been ahead of the times. You've been early adopters of new technology, and you've been successful because of it.

•

However, the new technology you implemented ten, or even five years ago is now old technology. But that doesn't mean your legacy information is useless. M.I.S. Print can convert old Xerox and line printer data into PostScript for printing on cutting-edge DocuTech 2000 Series Production Publishers. It's your business... **powered by DocuTech.**

## XEROX DOCUTECH 2000 SERIES

# M.I.S. Print for DocuSP

M.I.S. Print for Xerox DocuSP is an innovative, integrated software solution that converts Xerox and line printer data streams—including DJDEs and Metacode—to PostScript for printing on all Xerox DocuTech 2000 Series Production Publishers. The M.I.S. Print solution is available as an option resident either on a single Xerox DocuSP printer controller or on a separate Sun platform\*.

M.I.S. Print allows DocuTech Production Publishers to process legacy LCDS applications as well as PostScript. You can merge M.I.S. Print variable data from multiple sources in addition to viewing and reprinting jobs. This solution paves the way for you to move into Open Systems printing today, without reprogramming legacy applications. It also includes print output support for mainframe, network, and electronically stored document environments.

Backed by the Xerox Total Satisfaction Guarantee along with the Rochester Software Associates' 100% Satisfaction Guarantee, M.I.S. Print for Xerox DocuSP offers a total print strategy for your migration to Open Systems printing.

### Features and Benefits

- Runs on the DocuSP controller, eliminating the need for a second Sun workstation for the Xerox DocuTech 2000 Series 65, 6100, 6135, 6155, 6180 Production Publishers and DocuPrint 65.
- Converts Xerox and line printer data streams to PostScript.
- Merges images, electronic forms, and variable data.
- Supports DJDE, Metacode, FSL, JSL, FRM, FNT, LGO, and IMG.
- Proven, integrated solution.
- Increases print capabilities up to 180 ppm.
- Moves your business to Open Systems printing.
- Preserves investment in legacy applications.
- Reduces expenses by consolidating printers.
- Shares print resources for network and MIS/DP applications.
- Enables distributed printing.

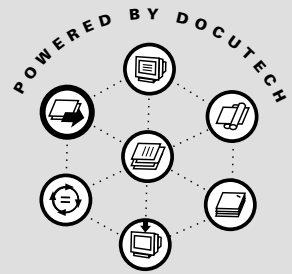

### Configuration Specifications

- Contact RSA at (716) 262-2690.
- Solution includes: M.I.S. Print license and 4 mm tape drive for back-up (modem for remote access, installation and connectivity provided with DocuSP).
- Connectivity options:
  - Multichannel (bus and tag) – channel controller required.
  - TCP/IP.
  - Barr S370.

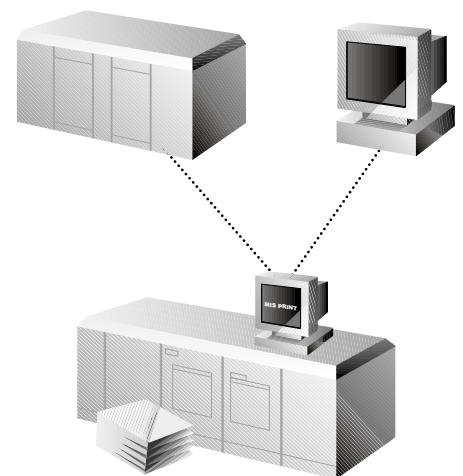

\* Consult your Xerox analyst to help decide which option is most appropriate for your workflow requirements.
