Summary Table – Voluntary Product Accessibility Template (VPAT)

| Criteria | Supporting Features | Remarks and explanations |
|--|---------------------|---|
| Section 1194.21 Software Applications and Operating Systems | Supports | The product is compliant with Rule 1194.21. |
| Section 1194.22 Web-based internet information and applications | Not applicable | The product does not include Web pages or applications. |
| Section 1194.23 Telecommunications Products | Not applicable | The product is not a telecommunications product. |
| Section 1194.24 Video and Multi-media Products | Not applicable | The product is not a video or multi-media product. |
| Section 1194.25 Self-Contained, Closed Products | Not applicable | The product is not a self-contained, closed product. |
| Section 1194.26 Desktop and Portable Computers | Not applicable | No computer is sold as part of the product. |
| Section 1194.31 Functional Performance Criteria | Supports | The product is compliant with Rule 1194.31. |
| Section 1194.41 Information, Documentation, and Support (Added by Xerox) This rule covers accessibility of documentation, training and support for IT products. Xerox includes rule 41 in all its assessments. | Supports | The centralization of documentation, training, and support services for most Xerox products allows us to achieve compliance across the corporation. |

| Criteria | Supporting Features | Remarks and explanations |
|--|---------------------|--|
| (a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually. | Supports | All commands that can be described textually can be executed from the keyboard. |
| (b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer. | Supports | The product software does not override or disable accessibility features of the host operating system or other software possessing features that have been developed and documented according to industry standards. |
| (c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes. | Supports | A well defined, on-screen indication of the current focus is provided, and the focus is programmatically exposed so that Assistive Technology can track focus and focus changes. |
| (d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text. | Supports | The program code makes the appropriate user interface elements available to Assistive Technology. |
| (e) When bitmap images | Supports | Bitmap image meanings remain consistent throughout the |

| Criteria | Supporting Features | Remarks and explanations |
|--|---------------------|---|
| are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance. | | application. |
| (f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes. | Supports | All textual information is provided through operating system functions. |
| (g) Applications shall not override user selected contrast and color selections and other individual display attributes. | Supports | The product software does not override user-selected contrast and color selections and other individual display attributes. |
| (h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user. | Not applicable | Animation is not used for control elements or relevant text. |
| (i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element. | Supports | The product software does not use color as the only means of conveying information. |
| (j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided. | Not applicable | The application does not permit a user to adjust color and contrast settings. |
| (k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz. | Supports | The product software does not use (avoids) flashing elements. |
| (l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Supports | Electronic forms allow people using Assistive Technology to accurately complete and submit the forms. |

| Criteria | Supporting Features | Remarks and explanations |
|---|---------------------|---|
| (a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided. | Supports | All areas requiring user interaction provide at least one mode of operation and information retrieval that does not require user vision. |
| (b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided. | Supports | No areas require visual user interaction with visual acuity better than 20/70. |
| (c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided | Supports | All areas requiring user interaction provide at least one mode of operation and information retrieval that does not require user hearing. |
| (d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided. | Not applicable | No audio information is required for use of the product. |
| (e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided. | Supports | No operations require speech. |
| (f) At least one mode of operation and information retrieval that does not require fine motor control or | Supports | No operations require fine motor control or simultaneous actions. |

| Criteria | Supporting Features | Remarks and explanations |
|--|---------------------|--------------------------|
| simultaneous actions and that is operable with limited reach and strength shall be provided. | | |

**Section 1194.41 Information, Documentation and Support - Detail
(Xerox Addition to VPAT)**

[Back to top](#)

| Criteria | Supporting Features | Remarks and explanations |
|---|---------------------|--|
| (a) Product support documentation provided to end-users shall be made available in alternate formats. | Supports | Product support documentation is available in alternate format. |
| (b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge. | Supports | Accessibility and compatibility information is available on www.xerox.com/section508/ . |
| (c) Support services for products shall accommodate the communication needs of end-users with disabilities. | Supports | Xerox provides support services that accommodate the communication needs of end-users with disabilities. |

What is the Voluntary Product Accessibility Template (VPAT)?

The purpose of the Voluntary Product Accessibility Template is to assist Federal contracting officials in making preliminary assessments regarding the availability of commercial Electronic and Information Technology products and services with features that support accessibility. It is assumed that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, "e.g., equivalent facilitation." The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

User Tasks Assessed

For the Xerox Phaser 6140 Color Printer, general user tasks were assumed to be programming and running jobs. According to the Federal Access Board, tasks such as clearing jams, loading supplies, adding paper are considered maintenance tasks and are not included in this summary.

Xerox Product Accessories for People with Disabilities

In addition to the award-winning Xerox Copier Assistant, Xerox provides additional accessories for people with disabilities; for example:

- Braille enablement – Pressure sensitive labels allow Braille to be added to almost any copier control console.
- Angled console – This kit, which is currently available for a number of models, inclines the copier console, allowing wheelchair users to view and reach the controls.
- Footswitch – An electrically operated switch models, which is available on many models, can be used to actuate the "Start Print" button.

For additional information on these and other accessories, contact your Xerox sales representative or call 1-800-ASK-XEROX (1-800-275-9376).
