# Integrated Server for the Xerox® PrimeLink® B9100 Copier/Printer Series

Next-level monochrome productivity.

The Xerox® B9100 Series Copier/Printer combines the walk-up simplicity of an office or work group device with the wider capabilities of a light production press. Its integrated server combines powerful performance with simple, push-button usability.

Extend your capabilities with apps from the Xerox App Gallery.

- Tailor your device to work the way you do with an ever-evolving selection of innovative apps available on the Xerox App Gallery.

- Increase your opportunities with an expansive media selection – including Extra Long Sheet (XLS) for creative banner printing – and inline finishing capabilities ranging from stapling and hole-punching to folding for presentations, brochures, reports and newsletters.

- Use Xerox® Standard Accounting Feature and internal auditing to track device usage, set limits and control costs.

- Customise your print driver settings to save on specific applications.

- Maximise your productivity by performing scan, print, copy, fax* and file routing operations simultaneously.

- Easily share files or introduce electronic archiving with powerful scan capabilities. Text-searchable files make retrieval simple. And compression technology reduces network load for faster transmission.

- Automate document routing to predefined locations such as email addresses with job flow sheets.

- Enjoy automatic installation, troubleshooting, feature setup and upgrades with the Xerox® Embedded Web Server.

- Replenish supplies automatically – Automated Meter Readings (AMR) collects and submits readings, and Automatic Supplies Replenishment (ASR) orders ink whenever supplies run low.

- Securely print from any email-enabled device with Xerox @PrintByXerox App. No software or app to download. No IT intervention. Just send an email and print at the device.
