Compart AG

DocBridge® Product Suite

The DocBridge® product suite of flexible, scalable, production products for document, print stream, and output management enables organizations to manage, optimize, QA, and distribute enterprise and production output. The suite, which includes DocBridge® Mill Plus, DocBridge® Queue Processor, DocBridge® View, and DocBridge® Delta, is ideal for large scale Enterprise Data Centers that are multi vendor environments, Service Bureaus, Print Service Providers and Inplants. These environments typically have complex and mixed-delivery requirements generating high volume batches of PDF, AFP, and LCDS transactional documents, customer correspondence, or on-demand documents.

Solution

Compart DocBridge® improves production workflow and printer utilization by preparing output for high speed, full color, and e-delivery channels. The DocBridge Suite can modify documents post composition, eliminating the need to go back upstream in the workflow. It can merge black and white with color and make output files smaller and device friendly. This improves delivery time, supports multi-channel communications, reduces errors, and lowers operating costs.

Value

The DocBridge® Suite helps organizations by:

- Enabling more efficient full color workflows from legacy applications without rebuilding them.
- Repurposing print documents by optimizing for web and mobile presentment.
- Reducing waste through implementation of print on demand.

Benefits

Maximum flexibility – Ideal for Enterprise Businesses with complex requirements. Provides faster onboarding.

- Most complete matrix of input & output streams
- Multi-platform support
- Available SDKs/Toolkits for integration

Highly efficient – Gets more jobs done in the same amount of time. Streamlines workflow to maximize efficiencies.

- In-memory transformation avoids multi-pass conversion process
- Simultaneous modification, optimization, management, and conversion for complex requirements in a single pass
- Dynamically merges legacy data with desktop publishing for white paper production without disrupting workflow

Benefits, continued

Dependable and responsive

- Core technology is natively built to support multiple operating systems enabling the enterprise to run consistently across all platforms without reconfiguration
- Native development removes dependency on 3rd party solutions, providing better support while ensuring speed, file size efficiency and document integrity

Fully featured and versatile

- Supports and adjusts all color formats in the industry
- Supports a rich set of color management features including CIE Lab, color space mapping, dithering algorithms, and ICC profiling
- Intelligently queries IPDS printer and automatically sends optimal color stream to the device
- Optimized bar code handling specific for ink jet technologies enables higher read rates
- White space management support is ideal for "last minute" Transpromo with dynamic message insertion

Specifications

Software requirements:

DocBridge Mill Plus

- Operating System DocBridge Workbench for Mill: MS Windows 2003 32/64-bit, MS Windows 2008 32/64-bit, MS Windows 7 32/64-bit

DocBridge Queue Processor

- Standard Client Platforms Operating System: MS Windows (XP and above)
- Interface to Other Systems: Web service call: REST protocol

DocBridge View

- Operating System: MS Windows Server 2003 32-bit, MS Windows 2008 32/64-bit, MS Windows XP 32-bit, MS Windows 7 32/64-bit

DocBridge Delta

- Delta's web interface requires web browsers with full HTML5 support: Google Chrome (latest version), Firefox version 4 and above, Internet Explorer 9 and above (older versions are not supported due to lack of HTML5 support), other HTML5 browsers may work but are untested

The screenshot displays the DocBridge Workbench for Mill 1.1.1 interface. The main window shows a document titled 'CoverLetterElectricBlankets.afp'. The interface is divided into several panels:

- Page Structure:** A table listing document elements and their sequence numbers.
- Properties:** A panel for editing the selected element's properties.
- Preview:** A window showing the rendered document content.
- Log:** A window showing system messages and error logs.

Specifications, *continued*

Hardware requirements:

DocBridge Mill Plus

- Operating System Server: MS Windows 2003 32/64-bit, MS Windows 2008 32/64-bit, SUSE Linux Enterprise (SLES) 11 SP2 & 12 64-bit, Debian 6 32/64-bit, AIX 6.1 64-bit (PowerPC, Solaris 10 (SPARC)
- Additional Operating System for cpmill and cpmcopy: Linux (Kernel 3.1, Intel) 32/64-bit, AIX 5.3 (PowerPC) 32/64-bit, Solaris 8 (SPARC) 32-bit, Solaris 10 (Intel) 32-bit, HP-UX 11.23 (Itanium) 32-bit

DocBridge Queue Processor

- Standard Server Platform Operating System: MS Windows (XP and above)
- Additional Platforms (upon request): Linux (Kernel 2.6, Intel) 32/64-bit

DocBridge View

- Operating System: MS Windows Server 2003 32-bit, MS Windows 2008 32/64-bit, MS Windows XP 32-bit, MS Windows 7 32/64-bit

DocBridge Delta

- Operating System: MS Windows Server 2003 32/64-bit, MS Windows Server 2008 32/64-bit, MS Windows Server 2008 R2 32/64-bit, MS Windows 7 32/64-bit, Linux (Kernel 2.6 Intel) 32/64-bit, Solaris 10 (SPARC) 32-bit
- Application Server: Apache Tomcat 6.0.32 Included with installation

Xerox products supported:

- Impika
- CiPress

Applications supported:

- Transactional documents, statements, invoices/bills, direct marketing/direct mail, TransPromo applications, policies, contracts, books, manuals, letters/correspondence, proposals
