

Xerox® EX 2100 Print Server Powered by Fiery®

Achieve efficiency through automation. Improve your bottom line with best-in-class processing, outstanding color, time-saving workflow and variable data capability.

Key Benefits of the Xerox® EX 2100 Print Server

More consistent and accurate color—The EX 2100 Print Server provides color management tools that give operators easy control of color quality and repeatability using Full Width Array technology for automated calibration and profiling. Fiery Ultra Smooth Gradients combines 10-bit architecture and special processing to deliver stunning, smooth gradients that will delight your customers by printing with the true appearance designers intended.

More services income—The Fiery variable data printing (VDP) solution supports industry-leading formats such as PPML, PDF/VT and compatibility with VPS, plus supports popular VDP composition software as well as the entry level Fiery FreeForm™.

More finished jobs in less time—Fiery Command WorkStation® centralizes job management and provides an intuitive user interface to shorten setup times and automate common tasks to reduce errors.

More seamless integration—The EX 2100 Print Server integrates with technologies such as Xerox® FreeFlow® Workflow and Xerox® FreeFlow® Core, plus other EFI® solutions like Fiery Central, EFI Digital StoreFront® and EFI MIS/ERP business software. Fiery JDF technology automates and integrates your business and print process to help you produce more jobs profitably.
