

Xerox® EX-P 3100 Print Server Powered by Fiery®

Achieve speed, efficiency and amazing color. The Xerox® EX-P 3100 Print Server Powered by Fiery is an ideal companion to the Xerox® Versant® 3100 Press, giving you the means to truly do more for your customers.

The more jobs you can produce, the greater your profitability in an increasingly challenging print marketplace. The EX-P 3100 Print Server features HyperRIP, a unique speed-enhancing technology that enables blazing-fast RIP speeds. Two HyperRIP modes (for single and multiple jobs) optimize job processing speed to help achieve uninterrupted production and higher profits.

Key Benefits of the Xerox® EX-P 3100 Print Server

More precise, consistent color. Fiery technology gives the best out-of-the-box color consistency and accuracy with powerful color matching, profiling and automated calibration using Xerox® Full Width Array technology. Fiery® Graphic Arts Package, Premium Edition, makes advanced color troubleshooting, preflight and proofing tasks quick and precise.

Fiery Ultra Smooth Gradients combines 10-bit architecture and special processing to deliver stunning, smooth gradients that will delight your customers by printing with the true appearance designers intended.

More high-value jobs, faster. Fiery Command WorkStation® and Fiery Impose-Compose make job management faster and more efficient, increasing your production and reducing errors by centralizing job makeready in an intuitive, visual user interface.

Do more in less time with the EX-P 3100 Print Server's powerful variable data printing (VDP) capabilities. It supports all industry-standard VDP formats, enabling a single, common print production workflow for all file types.

More seamless integration. The EX-P 3100 Print Server integrates with technologies such as Xerox® FreeFlow® Core, plus EFI™ MIS/ERP business software and leading prepress workflows. Fiery JDF technology automates and integrates your business and print process to help you produce more jobs profitably.
