

Your Print Production Just Got Smarter.

When printing millions of documents, it's hard to keep track of each page. Videk's DocuVision Edge does it for you. Protecting your customers personal information is critically important. A front-to-back mismatch that exposes the wrong person's information can have negative implications. DocuVision® Edge systems replace manual, time-consuming human inspection processes with powerful, productivity-driving automation so you can meet each of your SLAs with confidence.

CRITICAL FOR HEALTHCARE & INSURANCE, BANKING & FINANCIAL, TRANSACTIONAL & PERSONALIZED DIRECT MAIL

IT'S ALL ABOUT THE DATA

For transactional documents or targeted personalized direct mail, verifying digital information can be critical for compliance and regulatory concerns.

Key Features:

- OCR/ Barcode Reading
- Front-to-Back Matching
- Out-of-Sequence Checking
- Job Reporting

PROTECT PERSONAL INFORMATION

Front-to-back matching ensures personal information stays protected.

- Inspect a bar code on each side of every printed page
- Automatically stop the press if a mismatch or missing bar code is detected
- Enhance compliance on each run

ENSURE DOCUMENT INTEGRITY

Guarantee secure, accurate output on each print run.

Robust in-line inspection and verification tools analyze regions of interest on each page to:

- Detect duplicate or missing pages across a run
- Sequence Verification tools ensures there are no out-of-order pages

PROVIDE AUDIT TRAIL

No more missing, duplicated or out-of-sequence documents.

- Proof of print that your customers demand
- Generate sharable end-of-job reports that document errors and job details
- Detailed analytics for proof of work, job accounting and regulatory compliance
- Print run reports are generated in the system. CSV Data available to export for universal import.

DIRECT MAIL

Protect your data and ensure piece-level accountability on every run.

Specifically designed for the Xerox Baltoro HF Presses, Videk cameras are mounted onto the Baltoro Height Transition Module. DocuVision Edge images and inspects designated regions of interest (ROIs) on every page and reads barcodes. DocuVision Edge analyzes the data using logic tools for matching, sequence, and set verification to ensure there are no missing, duplicate or out-of-order pages.

Videk DocuVision® Edge
Document Integrity System for
Xerox Baltoro HF Presses

xerox™

Videk Vision Caddie stores the controller with other necessary components and includes pole mounted monitor for display and 22" touch screen monitor and wireless keyboard/mouse combo

Two cameras are mounted onto the Baltoro Height Transition Module (HTM) for duplex inspection

If an error is detected, DocuVision Edge alerts the operator and can initiate a controlled printer stop.

Full range of DocuVision inspection tools for advanced data integrity.

INSPECT, REACT, REPORT & PROTECT

In any printing environment, errors can happen. The entire process—from document composition to loading the incorrect stock, to the occasional print quality error compounded by an unreliable inspection protocol—leaves the operation at risk.

Videk's real-time intelligent vision inspection & data management tools remove that risk.

Videk's Digital Eyes catch the mistakes that human eyes miss.

Videk is a global provider of vision-based print verification systems, inserter input and output scanning systems, barcode scanning technology, data management software and professional services for enterprises in finance, insurance, utilities, government, manufacturing, and healthcare.
