Safety Data Sheet

SDS #: A-10010BULK

Bulk Toner

Issuing Date 2015-10-06  Revision Date 2015-10-06  Version 1

Active

1. Product and Company Identification

Trade Name  Toner for WorkCentre 5325, WorkCentre 5330, WorkCentre 5335

Part no.  502S68746

Color  Black
Pure substance/preparation  Preparation

Identified uses  Xerographic printing

Manufactured by  Xerox Corporation
  Rochester, NY 14644

Emergency telephone  Safety Information US: (800) 275-9376
  Chemical Emergency only (Chemetrec) (800) 424-9300

2. Hazards Identification

Warning

Emergency Overview
May form combustible dust concentrations in air

<table>
<thead>

Classification of the substance or mixture

Industrial use / Bulk containers

OSHA Hazard Classification  Combustible dust

Label elements

Signal Word  Warning

Hazard Statements  May cause combustible dust concentrations in air

Precautionary Statements
Prevent dust cloud
Sweep up or vacuum with electrically protected vacuum cleaner and collect in suitable container for disposal.
Use non-sparking tools and equipment
Keep away from sources of ignition - No smoking

Potential Health Effects

Principle Routes of Exposure
Acute toxicity  Inhalation
Eyes
No known effect
Skin
No known effect
Inhalation
No known effect
Ingestion
No known effect

Chronic effects
No known effects under normal use conditions
Chronic toxicity
Overexposure may cause:
mild respiratory irritation similar to nuisance dust.
Main symptoms
None under normal use conditions
Aggravated medical conditions
The environmental impact of this product has not been fully investigated. However, this preparation is not expected to present significant adverse environmental effects.

3. Composition/Information on Ingredients

<table>
<thead>
<tr>
<th>Chemical Name</th>

</tbody>
</table>

4. First Aid Measures

General advice
For external use only. When symptoms persist or in all cases of doubt seek medical advice. Show this material safety data sheet to the doctor in attendance.

Eye contact
Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes

Skin contact
Wash skin with soap and water

Inhalation
Move to fresh air

Ingestion
Rinse mouth with water and afterwards drink plenty of water or milk

Notes to physician
Treat symptomatically

Protection of first-aiders
No special protective equipment required

5. Fire-Fighting Measures

Flammable properties
Not flammable. Will not readily ignite

Flash point
Not applicable

Suitable extinguishing media
Use water spray or fog; do not use straight streams, Foam

Unsuitable extinguishing media
Do not use a solid water stream as it may scatter and spread fire

Specific hazards arising from the chemical
Fine dust dispersed in air, in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard

Hazardous combustion products
Hazardous decomposition products due to incomplete combustion, Carbon oxides, Nitrogen oxides (NOx)

Explosion Data
Sensitivity to Mechanical Impact
Not impact sensitive
Sensitivity to Static Discharge
Fine dust dispersed in air, in sufficient concentrations, and in the
presence of an ignition source is a potential dust explosion hazard

Note
See Section 9 for physical properties related to explosibility

Protective Equipment and Precautions for Firefighters
In the event of fire and/or explosion do not breathe fumes. Wear fire/flame resistant/retardant clothing. Use self-contained pressure-demand breathing apparatus if needed to prevent exposure to smoke or airborne toxins.

6. Accidental Release Measures

<table>
<thead>
<tr>

</tbody>
</table>

7. Handling and Storage

Advice on safe handling
Handling practices and processes should be consistent with the safe handling of combustible dust.
Prevent dust cloud
In case of insufficient ventilation, wear suitable respiratory equipment
Keep away from open flames, hot surfaces and sources of ignition
Take precautionary measures against static discharges

Technical measures/Storage conditions
Keep container tightly closed in a dry and well-ventilated place, Store at room temperature

Hygiene measures
Handle in accordance with good industrial hygiene and safety practice

Industrial User
Do not eat, drink or smoke when using this product
Wash hands before breaks and at the end of workday
Provide regular cleaning of equipment, work area and clothing.

8. Exposure Controls/Personal Protection

| Exposure guidelines | No information available |

Product information

| ACGIH TLV TWA | 10 mg/m³ (inhalable particles) |
| ACGIH TLV TWA | 3 mg/m³ (respirable dust) |
| OSHA PEL TWA | 15 mg/m³ (total dust) |
| OSHA PEL TWA | 5 mg/m³ (respirable dust) |
| Xerox Exposure Limit | 2.5 mg/m³ (total dust) |
| Xerox Exposure Limit | 0.4 mg/m³ (respirable dust) |

Other Information
The results obtained from a Xerox sponsored Chronic Toner Inhalation Study demonstrated no lung changes in rats for the lowest (1 mg/m³) exposure level (the level most relevant to potential human exposure). A very slight degree of fibrosis was noted in 25% of animals at the middle (4mg/m³) exposure level, while a slight degree of fibrosis was noted in all the animals at the highest (16
mg/m³) exposure level. These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lungs for a prolonged period. This study was conducted using a special test toner to comply with an EPA testing protocol.

**Occupational Exposure Controls**

**Engineering measures**
Engineering controls should be used to maintain airborne dust levels below established exposure limits

**Industrial use**
Equipment and processes should be designed and operated in accordance with directives for safe handling of combustible dust. Provide appropriate exhaust ventilation at places where dust is formed. Ensure all equipment is electrically grounded before beginning transfer operations.

**Personal Protective Equipment**

**Industrial use / Bulk containers**

- **Respiratory protection**: No special protective equipment required
- **Eye/Face protection**: No special protective equipment required
- **Skin and body protection**: No special protective equipment required
- **Hand protection**: No special protective equipment required

**Industrial use**
If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Wear protective eyewear (goggles)

10. Stability and Reactivity

Reactivity
No dangerous reaction known under conditions of normal use

Stability
Stable under normal conditions

Incompatible products
None

Conditions to Avoid
Heat, flames and sparks, Take precautionary measures against static discharges, Prevent dust cloud

Hazardous Decomposition Products
None under normal use

Hazardous polymerization
Hazardous polymerization does not occur

Hazardous reactions
None under normal processing

11. Toxicological Information

The toxicity data noted below is based on the test results of similar reprographic materials.

Acute toxicity

Product information

Irritation
No skin irritation, No eye irritation

LD50 Oral
> 5 g/kg (rat)

LD50 Dermal
> 5 g/kg (rabbit)

LC50 Inhalation
> 5 mg/L (rat, 4 hr)

Eyes
No known effect

Skin
No known effect

Inhalation
No known effect

Ingestion
No known effect

Chronic toxicity

Product information

Chronic effects
No known effects under normal use conditions

Main symptoms
Overexposure may cause: mild respiratory irritation similar to nuisance dust.

Aggravated medical conditions
None under normal use conditions

Carcinogenicity
See "Other Information" in this section.

Other information

The IARC (International Agency for Research on Cancer) has listed carbon black as "possibly carcinogenic to humans". The classification is based on studies evaluating pure, "free" carbon black. In contrast, toner is a formulation composed of specially prepared polymer and a small amount of carbon black (or other pigment). In the process of making toner, the small amount of carbon black becomes encapsulated within a matrix. Xerox has performed extensive testing of toner, including a chronic bioassay (test for potential carcinogenicity). Exposure to toner did not produce evidence of cancer in exposed animals. The results were submitted to regulatory agencies and published extensively.

The IARC (International Agency for Research on Cancer) has listed titanium dioxide as "possibly carcinogenic to humans". The classification is based on studies in rats using pure, unbound TiO2. Based on the review of available study results, when this product is used as intended, Xerox has concluded that the presence of titanium dioxide in this mixture does not present an increased risk of lung cancer or chronic respiratory disease.

Other toxic effects
**Product information**

- **Sensitization**: No sensitization responses were observed
- **Mutagenic effects**: Not mutagenic in AMES Test
- **Developmental toxicity**: None known
- **Teratogenicity**: None known
- **Target organ effects**: None known
- **Other adverse effects**: None known
- **Aspiration Hazard**: Not applicable

**12. Ecological Information**

**Ecotoxicity**
The environmental impact of this product has not been fully investigated. However, this preparation is not expected to present significant adverse environmental effects.

**Persistence and degradability**
No information available.

**13. Disposal Considerations**

**Waste Disposal Methods**
This material, as supplied, is not a hazardous waste according to Federal regulations (40 CFR 261). This material could become a hazardous waste if it is mixed with or otherwise comes in contact with a hazardous waste, if chemical additions are made to this material, or if the material is processed or otherwise altered. Consult 40 CFR 261 to determine whether the altered material is a hazardous waste. Consult the appropriate state, regional, or local regulations for additional requirements.

**Contaminated packaging**
Dispose of in accordance with local regulations.

**14. Transport Information**

**Note**
This material is not subject to regulation as a hazardous material for shipping.

**15. Regulatory Information**

**International Inventories**

- **TSCA**: Complies
- **DSL/NDSL**: Complies
- **EINECS/ELINCS**: Complies

**U.S. Federal Regulations**

- **SARA 313**: Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). This product does not contain any chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372
- **Clean Water Act**: This product is not regulated as a pollutant pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42).
- **Clean Air Act, Section 112 Hazardous Air Pollutants (HAPs) (see 40 CFR 61)**: This product is not regulated as a hazardous air pollutant (HAPS) under Section 112 of the Clean Air Act Amendments of 1990.
- **CERCLA**: This material, as supplied, does not contain any substances regulated as hazardous substances under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 CFR 302) or the Superfund Amendments and Reauthorization Act (SARA) (40 CFR 355). There may be specific reporting requirements at the local, regional, or state level.
pertaining to releases of this material

TSCA
TSCA 12(b) does not apply to this product.

U.S. State Regulations

California Proposition 65
Titanium dioxide is regulated under California Proposition 65 only if a product results in exposure in the form of "airborne, unbound particles of respirable size". Toner products do not result in exposure to titanium dioxide in the form of "airborne, unbound particles of respirable size". Therefore, the requirements of Proposition 65 do not apply to this product.

U.S. State Right-to-Know Regulations
Although this product contains substances included in some U.S. State Right-to-Know regulations, the particles are bound in a unique matrix and, therefore, the product does not pose any specific hazard.

Canada
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the SDS contains all the information required by the CPR.
