

## Recommended Xerox Media for Xerox® DocuColor® 12 LP/CP and DCCS 50 (Europe)

### **Revision 7.0, March 2012**

This supersedes any previous Recommended Media List for Xerox DocuColor 12 LP/CP and DCCS 50.

### **Important Notes**

Media recommendations made in this publication are based on qualification tests\* conducted using standard test images with moderate to heavy image area coverage. Test duration for each product/media type is based on the suggested machine monthly copy/print volume. Test machines are maintained within specifications defined by user documentation.

\* Testing environment Temperature 23°C ±2, Relative Humidity 50 % ±5.

In the enclosed Recommended Media List, green shaded areas marked with an "x" indicate approved product/media type configurations. Although these configurations are recommended, reliability is based on your operating environment and application mix.

Machine reliability specifications may be affected by increased usage of Heavy Weight mode and Extra Heavy Weight mode. In addition, variances in machine reliability may occur due to extended use of some media types. Your Xerox Sales or Service representative can advise you on using Heavy Weight mode, Extra Heavy Weight mode or special application media types for long duration copy/print runs.

For specifications and a description of the various media types discussed in this publication, please refer to the Color Material Usage Guide that comes with your machine.
