Recommended Xerox Media for Phaser 8500DN, 8500DX, 8550DP, 8550DT, and 8550DX (Europe)

Revision 3.0 February 2007

Last Revision July 2006

This supersedes any previous Recommended Media for Xerox Phaser 8500DN, 8500DX, 8550DP, 8550DT, and 8550DX list

Important Note:

All media are listed by product, Paper Type System Setting, Paper Type, weight (standard gsm), re-order number, size, and tray runability. The additional information column is for hints and tips on how to run certain media applications.

Media recommendations made in this publication are based on qualification tests* conducted using standard test images with moderate to heavy image area coverage. Test duration for each product/media type is based on the suggested machine monthly copy/print volume. Test machines are maintained within specifications defined by user documentation.

***Testing environment Temperature 20 degreesC±4, Relative Humidity 40% ±10%. For those customers operating equipment in environments of extremely low or high humidity - not all products on this list have been validated under these conditions. The products indicated by an asterisk represent those where such testing has taken place and the media has been deemed suitable for these environments. Media appearing on this list without an asterisk may be suitable, however the necessary testing has not been conducted.**

***Machine reliability specifications may be affected by increased usage of the Transparency, Card Stock, Label, and Special modes. In addition, variances in machine reliability may occur due to extended use of some media types. Your Xerox service representative can advise you on special application media types for long duration copy/print runs.**

For specifications and a description of the various media types discussed in this publication, please refer to www.Xerox.com.

For additional recommended Phaser media, look under Supplies on: <http://www.office.xerox.com/> and select your Product Family.

WARRANTY DISCLAIMER
 Xerox makes no guarantees or warranties, either express or implied, concerning the performance, use or replacement of non-Xerox branded media or throughput products. Customers should inquire directly of their paper distributor or manufacturer for any guarantees they may offer. When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that their expectations are met. The quality of Xerox supplies is consistent from ream to ream, carton to carton, and it is backed by a Xerox 100% guarantee. The quality of non-Xerox branded paper may vary from ream to ream or carton to carton, so for optimum performance on Xerox color equipment, use only the best-Xerox Supplies.
