

Recommended Xerox Materials for WorkCentre 7655/7665 (EUROPE)

Revision 4.0 - Issued August 2009

last revision Feb 2007

Important Note:

All media is listed by product, machine run mode, Image Quality System Setting, weight (standard gsm), re-order number, size and tray runability. The additional information column is for hints and tips on how to run certain media applications.

Media recommendations made in this publication are based on qualification tests* conducted using standard test images with moderate to heavy image area coverage. Test duration for each product/media type is based on the suggested machine monthly copy/print volume. Test machines are maintained within specifications defined by user documentation.

* Testing environment Temperature 23 degrees C \pm 2, Relative Humidity 50% \pm 5.

*Machine reliability specifications may be affected by increased usage of the Heavyweight 1, Heavyweight 2, Coated 1, and Coated 2 modes. In addition, variances in machine reliability may occur due to extended use of some media types. Your Xerox service representative can advise you on using Heavyweight 1, Heavyweight 2, Coated 1 and Coated 2 modes or special application media types for long duration copy/print runs.

Environmental conditions may require that coated paper be fed one at a time through Tray 5 (Bypass). Relative Humidity greater than 40% could cause multifeeds. Output may require removal at 25 sheets in the tray when not using a finisher.

For Manual Duplex, It may be helpful to manually remove curl after printing side 1 before reloading sheets into feeder for side2.

WARRANTY DISCLAIMER

Xerox makes no guarantees or warranties, either express or implied, concerning the performance, use or replacement of non-Xerox branded media or throughput products. Customers should inquire directly of their paper distributor or manufacturer for any guarantees they may offer. When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that their expectations are met.

The quality of Xerox supplies is consistent from ream to ream, carton to carton, and it is backed by a Xerox 100% guarantee. The quality of non-Xerox branded paper may vary from ream to ream or carton to carton, so for optimum performance on Xerox color equipment, use only the best-Xerox Supplies.
