

Xerox[®] VersaLink C8000 and VersaLink C9000 - Europe Paper and Speciality Media Guide

Version 1.0 - November 2019

For your convenience, this guide includes the Recommended Media List

The Recommended Media List contains Xerox[®] paper and specialty media, digitally optimized, designed from stringent specifications and manufactured for optimal and constant image quality performance.

Xerox[™] branded paper and specialty media have undergone rigorous testing by Xerox. Any paper and print media that is featured on the Recommended Media List for a specific Xerox[™] printer or digital press will give optimum performance. This is how Antalis can offer 100% Performance Guaranteed.

Learn more at www.performance-guaranteed.com

Important Notes:

All media is listed by product, paper type, paper tray settings - image quality, weight (standard gsm), re-order number, size, tray runability, and integrated office finisher runability. The additional information column is for hints and tips on how to run certain media applications.

Machine reliability specifications may be affected by increased usage of Cardstock and Glossy Cardstock modes. In addition, variances in machine reliability may occur due to extended use of some media types. Your Xerox service representative can advise you on using Cardstock and Glossy Cardstock modes or special application media types for long duration copy/print runs.

Environmental conditions may require that Glossy papers be fed one sheet at a time through Bypass. Relative Humidity greater than 40% could cause multifeeds. Output may require removal at 25 sheets in the tray when not using a finisher. High area coverage jobs on glossy or coated media may cause Exit 2 Sensor Off Jam (77-105). If this occurs, change output destination to Center Tray Lower.

The BR Office Ready Finisher is capable of stapling at maximum; (maximum number will decrease if paper weight is greater than 24lb / 90 gsm):

50 Sheets of Paper up to the size of A3 Short Edge Feed (SEF)

Booklets: 60-300 gsm for non-glossy, up to 220 gsm for glossy

Bi-Fold: 60-220gsm

The Office Finisher LX is capable of stapling at maximum; (maximum number will decrease if paper weight is greater than 24lb / 90 gsm):

50 Sheets of Paper up to the size of A3 Short Edge Feed (SEF)

- C9000 supports 350 gsm Simplex, Bypass tray only

- C8000 supports up to 300 gsm
