

Xerox pioneered the practice of remanufacturing, reusing and the recycling of office equipment. Xerox IBS Limited customers have the following options to recycle and responsibly dispose of Xerox® equipment in line with the EU WEEE (Waste Electrical and Electronic Equipment) regulation.

The following Xerox® products are covered for pick-up for reuse or recycling from a customer site when existing equipment is being replaced.

- Leased products on a Xerox® Full Service Maintenance Agreement
- Leased products on a Xerox® PagePack® or Xerox® eClick® Program upon renewal
- Products under a Xerox® Managed Print Services Program upon renewal
- Sold products which are classed as B2B

According to the EU-WEEE directive, products that can be used in businesses as well as in private households are to be classed as B2C products. For B2C products, Xerox IBS Limited ROI is participating in the WEEE Ireland compliance scheme and Xerox IBS Limited NI is participating in ERP compliance scheme.

Customers can return those products for recycling via any of the collection centres approved under the WEEE Regulations free of charge. The participating producers pay the costs for further processing.

For the collection of Xerox® products purchased through indirect sales channels, we recommend contacting the relevant Xerox partner. Xerox partners can return end-of-life equipment for re-use and recycling. Xerox will manage through existing programmes.

The EEE Producer Registration number is IE 00277WB for Republic of Ireland and WEE/MM1269AA for Northern Ireland.

More [information regarding return and recycling of WEEE products](#) is included in the Product User Manual for the device.
