

Xerox pioneered the practice of remanufacturing, reusing and the recycling of office equipment. Xerox customers in Belgium and Luxembourg have the following options to recycle and responsibly dispose of Xerox® equipment in line with the EU WEEE (Waste Electrical and Electronic Equipment) directive and associated legislation in the EU-Member States.

The following Xerox® products are covered for pick-up for reuse or recycling from a customer site when existing equipment is being replaced.

- Leased products on a Xerox® Full Service Maintenance Agreement
- Leased products on a Xerox® PagePack® or e Xerox® Click® Program
- Products under a Xerox® Managed Services Program

For the collection of Xerox® products purchased through indirect sales channels, we recommend contacting the relevant Xerox partner. Xerox partners can return end-of-life Xerox® equipment for re-use and recycling to our logistics service provider in Herentals, Belgium. Xerox will cover the cost for recycling.

More information regarding return and recycling of WEEE products is included in the Product User Manual for the device.
