Application Connector
Quick, flexible integration of Xerox® DocuShare® with enterprise applications

The Connector lets you instantly access critical, relevant documents directly from key front- and back-office applications, further enabling them and optimising your technology investment.

SIMPLE INTEGRATION WITH BUSINESS APPLICATIONS
The Application Connector allows people to access documents from the applications they work in most, saving time and building efficiency.

It links to DocuShare content from a wide variety of applications, such as:

- Customer relationship management (CRM) such as Microsoft Dynamics, Salesforce or Oracle Siebel
- Enterprise resource planning (ERP) such as Oracle Netsuite or PeopleSoft
- Human resource management systems (HRMS)
- Finance and accounting systems such as Oracle Government Financials
- Many line-of-business applications such as DocuSign, Cerner, KRIS or Oracle Tutor

HOW THE APPLICATION CONNECTOR WORKS
The Application Connector provides third-party line-of-business application programmers with the ability to construct and display a link within an application that searches for and returns specific content from a DocuShare site (for example, a record in a Human Resources application that links to documents).

DocuShare content is found using criteria from the external application, and displays it in a browser window, so that an application can link into DocuShare in the context of a specific record or a business process. For example:

- A finance application may link to an invoice document that is associated with a purchase order number or other data.
- An operations manager might search the ERP system for all orders, receipts or invoice documents for a supplier, opening a DocuShare window with multiple documents.

REQUIREMENTS
Professional services by Xerox or by an expert partner are required to configure DocuShare or DocuShare Flex with the Application Connector.

SIMPLE SETUP
The Connector is easily set up, without requiring a long or complex implementation, or significant investment in developer or IT resources.
