The Application Connector is a professional services add-on to the Xerox® DocuShare Content Management Platform, or to Xerox® DocuShare Flex, enabling access to documents, images or other business content from virtually any third-party line-of-business or enterprise application.

**SIMPLE INTEGRATION WITH BUSINESS APPLICATIONS**

The Application Connector allows people to access documents from the applications they work in most, saving time and building efficiency. It links to DocuShare content from a wide variety of applications, including:

- **Customer relationship management (CRM)** such as Microsoft Dynamics, Salesforce, Oracle Siebel
- **Enterprise resource planning (ERP)** such as Oracle Netsuite or PeopleSoft
- **Human resource management systems (HRMS)**
- **Finance and accounting systems** such as Oracle Government Financials
- **Many line-of-business applications** such as DocuSign, Cerner, KRIS or Oracle Tutor

**HOW THE APPLICATION CONNECTOR WORKS**

The Application Connector provides third-party line-of-business application programmers the ability to construct and display a link within an application that searches for and returns specific content from a DocuShare site (for example, a record in a Human Resources application that links to documents).

DocuShare content is found using criteria from the external application and is displayed in a browser window so that an application can link into DocuShare in the context of a specific record or business process.

For example:

- A finance application may link to an invoice document that is associated with a purchase order number or other data.
- An operations manager might search the ERP system for all orders, receipts or invoice documents for a supplier, opening a DocuShare window with multiple documents.

**REQUIREMENTS**

Professional services by Xerox or by an expert partner are required to configure DocuShare or DocuShare Flex with the Application Connector.

**SIMPLE SETUP**

The Application Connector is easily set up, without requiring a long or complex implementation or significant investment in developer or IT resources.

**UPGRADE THE WAY YOU UPLOAD**

Uploads shouldn’t slow you down, and with the new Document Uploader Page, they’ve never been easier or faster. This intuitive feature makes it simple to drag-and-drop files directly into the designated DocuShare collection from your Enterprise Applications. Users will be automatically prompted to fill in the required information fields before upload commences; once done all documents are then transferred and saved to DocuShare.
