Material Safety Data Sheet

MSDS No.: A-1077
Distributor: Xerox Corporation
           Telephone Number(s): Safety Information: (800) 828-6571
           Health Emergency: (585) 422-2177
           Issue Date: 1/21/10
           Rescue (Chemtrec): (800) 424-9300
           Revision Date: N/A
           Transportation Emergency: (800) 828-6571
           Part No.: 6R1456, 6R1460, 6R1464

Section 1: Product Identification
Trade Name/Synonyms: WorkCentre 7120 Cyan Toner
Section 2: Emergency and First Aid
Primary Route of Entry: Inhalation
       Eyes: Flush with water
       Skin: Wash with soap and water
       Inhalation: Remove from exposure.
       Ingestion: Dilute stomach contents with several glasses of milk or water

Section 3: Toxicology and Health Information
The toxicity data noted below is based on the test results of similar reprographic materials:

Oral LD$_{50}$: >5 g/kg (rats) practically non-toxic.
Dermal LD$_{50}$: >5 g/kg (rabbits) practically non-toxic.
Inhalation LC$_{50}$: >5 mg/l (rats, 4hr exposure) practically non-toxic.
       >20 mg/l (calculated 1 hr exposure) non-poisonous, DOT
       TLV: 10 mg/m$^3$ (inhalable particles)
       PEL: 5 mg/m$^3$ (respirable dust)
       STEL: Not established
       Ceiling: Not established
       XEL$^{1/2}$: 0.4 mg/m$^3$ (respirable dust)
       Eye Irritation: Not an irritant
       Skin Sensitization: Not a sensitizer
       Skin Irritation: Not an irritant
       Human Path: Non-irritating, non-sensitizing
       Mutagenicity: No mutagenicity detected in Ames assay.
       Carcinogens: None present
       Aquatic LC$_{50}$: >1000 mg/l (fathead minnows) non-toxic.

Additional Information: The results obtained from a Xerox sponsored Chronic Toner Inhalation Study demonstrated no lung change in rats for the lowest (1mg/m$^3$) exposure level (the level most relevant to potential human exposure). A very slight degree of fibrosis was noted in 25% of animals at the middle (4mg/m$^3$) exposure level, while a slight degree of fibrosis was noted in all the animals at the highest (16 mg/m$^3$) exposure level. These findings are attributed to “lung overloading”, a generic response to excessive amounts of any dust retained in the lungs for prolonged period. This study was conducted using a special test toner to comply with EPA testing protocol. The test toner was ten times more respirable than commercially available Xerox toner, and would not be functionally suitable for Xerox equipment.
Section 4 – Physical Data

Appearance/Odor: Fine cyan powder/ faint odor
Boiling Point: Not applicable
Solubility in Water: Negligible
Evaporation Rate: Not applicable
Vapor Density (Air=1): Not applicable
Volatile: Not applicable % (Wt.) Not applicable % (Vol.)

Softening Range: 120°F -140°F
Melting Point: N.D.
Specific Gravity (H₂O=1): ~1
Vapor Pressure (mm Hg): Not applicable
pH:

Section 5 – Fire and Explosion Data

Flash Point (Method Used): Not applicable
Flash Point (Method Used): Not applicable
Flammable Limits: LEL: Not applicable, UEL: Not applicable
NFPA 704: Consumer Use and Storage (“Cartridge”/“Bottle”) – Health -0, Fire-1, Reactivity-0
Manufacturing Use and Storage (“Bulk Containers”) – Health -0, Fire-3, Reactivity-0
Extinguishing Media: Avoid direct stream – gently apply water mist, water fog, or foam
Special Fire Fighting Procedures: Avoid inhalation of smoke. Wear protective clothing and self-contained breathing apparatus.
Fire and Explosion Hazards: Toner is a combustible powder. Like most organic materials in powder form, it can form explosive mixtures when dispersed in air.

Section 6 – Reactivity Data

Stability: Stable
Hazardous Polymerization: Will Not Occur
Hazardous Decomposition Products: Products of combustion may be toxic. Avoid breathing smoke.
Incompatibility (Materials to Avoid): None known

Section 7 – Special Protection Information

Respiratory Protection: None required when used as intended in Xerox equipment.
Eye Protection: None required when used as intended in Xerox equipment.
Protective Gloves: None required when used as intended in Xerox equipment.
Other: For use other than normal customer – operating procedures (such as in bulk toner processing facilities), goggles and respirators may be required. For more information, contact Xerox.

Section 8 – Special Precautions

Handling and Storage: Keep container tightly closed
Conditions to Avoid: Avoid prolonged inhalation of excessive dust.

Section 9 – Spill, Leak, and Disposal Procedures

For Spills or Leakage: Sweep up or vacuum spilled toner and carefully transfer into sealable waster container. Sweep slowly to minimize generation of dust during clean-up. If vacuum is used, the motor must be rated as dust tight. A conductive hose bonded to the machine should be used to reduce static buildup (See Section 5). Residue can be removed with soap and cold water. Garments may be washed or dry-cleaned, after removal of loose toner.

Waste Disposal Method: This material is not a hazardous waste according to Federal Regulation 40 CFR 261 when disposed. State and Local requirements may, however, be more restrictive. Consult with the appropriate State and Local waste disposal authorities for additional information. Incinerate only in a closed container.

Section 10 – Transportation Information

This product is not regulated as a hazardous material
