Material Safety Data Sheet

Section 1: Product Identification

Trade Name/Synonyms: DocuColor 240/242/250/252/260 WorkCentre 7655/7665/7675, WorkCentre 7755/7765/7775 Black/Cyan/Magenta/Yellow Developer

Ingredients (% by wt.)

- Ferrite (>95%) 66402-68-4
- Resin (<5%) 292629-36-8
- Pigments (<5%) 1333-86-4/147-14-8/Proprietary

CAS No.

- 66402-68-4
- 292629-36-8
- 1333-86-4/147-14-8/Proprietary

Section 2: Emergency and First Aid

Primary Route of Entry: Inhalation

Symptoms of Overexposure:

Inhalation: None

Eyes:

Flush with water

Minimal respiratory tract irritation may occur as with exposure to large amounts of any non-toxic dust.

Skin:

Wash with soap and water

Medical Conditions Generally Aggravated by Exposure:

Skin: None when used as described by product literature.

Inhalation:

Additional Information

Ingestion

None

Section 3: Toxicology and Health Information

Oral LD<sub>50</sub>: >5 g/kg (rats) practically non-toxic.

TLV: 10 mg/m<sup>3</sup> (inhalable particles)

Dermal LD<sub>50</sub>: >5 g/kg (rabbits) practically non-toxic

3 mg/m<sup>3</sup> (respirable particles)

Inhalation LC<sub>50</sub>:

PEL: 15 mg/m<sup>3</sup> (total dust)

>5 mg/m<sup>3</sup> (respirable dust)

Eye Irritation: Not an irritant

STEL: Not established

Skin Sensitization: Not a sensitizer

Ceiling: Not established

Skin Irritation: Not an irritant

XEL<sup>1</sup>: 2.5 mg/m<sup>3</sup> (total dust)

Human Patch: Non-irritating, non-sensitizing

0.4 mg/m<sup>3</sup> (respirable dust)

Mutagenicity: No mutagenicity detected in Ames assay.

Carcinogens: None present

Aquatic LC<sub>50</sub>: >1000 mg/l (fathead minnows) non-toxic.

Additional Information:

The results obtained from a Xerox sponsored Chronic Toner Inhalation Study demonstrated no lung change in rats for the lowest (1mg/m<sup>3</sup>) exposure level (the level most relevant to potential human exposure). A very slight degree of fibrosis was noted in 25% of animals at the middle (4mg/m<sup>3</sup>) exposure level, while a slight degree of fibrosis was noted in all the animals at the highest (16 mg/m<sup>3</sup>) exposure level. These findings are attributed to “lung overloading”, a generic response to excessive amounts of any dust retained in the lungs for prolonged period. This study was conducted using a special test toner to comply with EPA testing protocol. The test toner was ten times more respirable than commercially available Xerox toner, and would not be functionally suitable for Xerox equipment.

1 XEL-Xerox Exposure Limit

604E14590
Section 4 – Physical Data

Appearance/Odor: Fine black, magenta, yellow, cyan powder/faint odor
Softening Range: 120°F - 140°F
Boiling Point: Not applicable
Melting Point: N.D.
Solubility in Water: Negligible
Specific Gravity (H₂O=1) ~1
Evaporation Rate: Not applicable
Vapor Pressure (mm Hg): Not applicable
Vapor Density (Air=1) Not applicable
pH: Not applicable

Section 5 – Fire and Explosion Data

Flash Point (Method Used): Not applicable
LEL: Not applicable, UEL: Not applicable
Flammable Limits: Consumer Use and Storage (“Cartridge”/“Bottle”) – Health -0, Fire-1, Reactivity-0
NFPA 704: Manufacturing Use and Storage (“Bulk Containers”) – Health -0, Fire-3, Reactivity-0
Extinguishing Media: Avoid direct stream – gently apply water mist, water fog, or foam
Special Fire Fighting Procedures: Avoid inhalation of smoke. Wear protective clothing and self-contained breathing apparatus.

Section 6 – Reactivity Data

Stability: Stable
Hazardous Polymerization: Will Not Occur
Hazardous Decomposition Products: Products of combustion may be toxic. Avoid breathing smoke.
Incompatibility (Materials to Avoid): None known

Section 7 – Special Protection Information

Respiratory Protection: None required when used as intended in Xerox equipment.
Eye Protection: None required when used as intended in Xerox equipment.
Protective Gloves: None required when used as intended in Xerox equipment.
Other: For use other than normal customer – operating procedures (such as in bulk toner processing facilities), goggles and respirators may be required. For more information, contact Xerox.

Section 8 – Special Precautions

Handling and Storage: Keep container tightly closed
Conditions to Avoid: Avoid prolonged inhalation of excessive dust.

Section 9 – Spill, Leak, and Disposal Procedures

For Spills or Leakage: Sweep up or vacuum spilled toner and carefully transfer into sealable waste container.
Sweep slowly to minimize generation of dust during clean-up. If vacuum is used, the motor must be rated as dust tight. A conductive hose bonded to the machine should be used to reduce static buildup (See Section 5). Residue can be removed with soap and cold water. Garments may be washed or dry-cleaned, after removal of loose toner.
Waste Disposal Method: This material is not a hazardous waste according to Federal Regulation 40 CFR 261 when disposed. State and Local requirements may, however, be more restrictive. Consult with the appropriate State and Local waste disposal authorities for additional information. Incinerate only in a closed container.

Section 10 – Transportation Information

This product is not regulated as a hazardous material.
