**FIERY EX2000d COLOR SERVER**

**SPECIFICATIONS**

**STANDARD HARDWARE**
- Dual 1 GHz Intel Pentium III processors
- 512 MB high-speed memory, 133 MHz system bus
- 80 GB hard drive (EH, 45, 10)
- CD-ROM drive; 250 MB Zip-drive
- Video and cable interface
- Fiery Advanced Controller Interface (FACI)
  - 15” flat panel display
  - Microsoft keyboard and mouse
  - X-Rite DTP32 Densitometer

**NETWORK PROTOCOLS**
- Simultaneous autoswitching protocols
  - EtherTalk Phase II
  - Novell IPX/SPX
  - TCP/IP, LPR
- SMB print sharing (over TCP/IP)
- Token Ring protocols (with optional interface card)
  - Novell IPX
  - TCP/IP, LPR
  - SMB print sharing

**NETWORK CONNECTIVITY**
- Ethernet 10/100BaseT
  - (Unshielded Twisted Pair) UTP
- Token Ring 4MBps/16MBps
  - (Unshielded Twisted Pair) UTP
  - (Shielded Twisted Pair) DB9 (optional)

**PAGE DESCRIPTION LANGUAGES**
- Adobe PostScript Level 3
- Native PDF printing
- EPS
- TIFF

**ADVANCED FEATURES**
- Fiery DocBuilder Pro™
- Variable Data Printing
  - Design/merge Pro™/Xerox Professional Edition with support for VIPP
  - Fiery FreeForm®

**COLORWISE PRO TOOLS 2.0™**
- Color Editor
- Profile Manager
- Calibration via X-Rite DTP32 Densitometer
- Color Setup

**REGULATORY APPROVALS**
- Safety
  - CE Mark
  - TUV/GS
  - CB Scheme
  - CSA
  - UL
  - CEM
  - EN55024 Part B (CE Marked)
  - FCC Class A
  - VCCI II

**POWER Supply**
- Auto-switching 110/220V, 50/60 Hz for global use

**POWER CONSUMPTION**
- 102.98 W (maximum)
- 353.4 BTU/hr

**RESOLUTION**
- Continuous tone at 600 x 600 dpi

**UTILITIES**
- Command WorkStation software for job management and control
- Fiery Link™
- Fiery Web Tools™
- Fiery Downloader™
- Fiery Spooler™

For more information, contact your local Xerox representative or call 1-800 ASK XEROX in the US or Canada. Also, you can visit our Web site at www.xerox.com.

For many of today’s color professionals, faster turnaround times, more complex customer requirements and increasing competition have caused them to raise an important question:

How do I extract every ounce of performance from my color production engine to achieve maximum productivity, quality and color fidelity?

The answer—the EFI Fiery EX2000d.

It’s a robust, richly featured color server that uses next-generation technology to deliver superior image quality, full color management flexibility and maximum productivity from your Xerox DocuColor 2045/2060.

**Power. Precision. Performance.**

**Welcome to the new standard in color server technology.**

**Built for speed**

At the heart of the EX2000d’s superior performance is EFI’s patented, state-of-the-art compression technology and powerful dual 1 GHz Intel Pentium III processors. This enables maximum optimization of your color production engine’s capabilities, allowing you to print at rated speed beginning with the second copy—a necessity for production-intensive environments. You’ll be able to run 45 or 60 impressions per minute even when printing complete, collated document sets.

**Professional color made simple**

The primary task of any color server is—quite simply—getting the color right. The Fiery EX2000d features ColorWise 2®*, the latest Fiery color management software, to make accurate, brilliant color an easy task for both entry-level users and seasoned professionals alike.

Basic color users will enjoy the intuitive simplicity of ColorWise 2.0, which makes printing to the EX2000d as simple as printing to an inkjet printer. For color experts, an expanded suite of color management tools within ColorWise Pro Tools opens up a whole new world of possibilities. With point-and-click simplicity, you can calibrate your DocuColor 2045/2060 to specific substrates; edit simulation or output profiles with the Color Editor; download ICC profiles via the Profile Manager; and configure default color management settings via the Fiery Color Setup.

With a new feature called RGB Separation, you can convert RGB data to device-specific CMYK to allow you to proof an unlimited range of options using the power of the Fiery instead of your desktop. In addition, RGB can save time and valuable disk space for graphic artists who design for CD-ROM and the Web. Bottom line? You’ll have an unprecedented amount of control over your output, with the ability to accurately predict/proof what your output will look like every time.

**Fiery Driver offers an easy interface for printing.**

**DocBuilder Pro™**

This breakthrough workflow tool enables imposition for printing booklets, brochures, magazine proofs and newsletters. It also supports PDF workflows by enabling entire documents to be previewed, edited and assembled at the PostScript level prior to RIP.

**Fiery Driver**

Fiery Driver is a graphical print driver interface designed to make DocuColor 2045/2060 printing even easier and more intuitive. When printing from your PC, Fiery Driver gives you access to all the functionality of the DocuColor 2045/2060 via simple, easy-to-use graphical menu options.

X-Rite’s DTP32 AutoScan Color Densitometer provides simple operation and automation for fast, accurate results and consistent color output every time.

Fiery Link provides users with comprehensive, up-to-the minute information on print jobs right from their workstation. The Fiery Link window appears right on your desktop, providing real-time job completion status so you can avoid time-consuming trips to the printer. In addition, you can monitor toner and paper levels, as well as current job status in the print queue to help manage print loads for peak efficiency.

**Tap into the full potential of your DocuColor 2045/2060**

For more information on how the Fiery EX2000d can help maximize the full potential of your DocuColor 2045/2060, contact your local Xerox representative or call 1-800-ASK XEROX. Or, visit our Web site at www.xerox.com.
