## RightOpt Guides Members to Better Health through Wisier Coach

Through RightOpt, our private exchange, members now have access to Wisier Coach, an offering from existing RightOpt solution partner Wisier Together.

With the Wisier Coach solution, Health Advocate health coaches — advocacy professionals and registered nurses — access and utilize Wisier Together's Wisier Health tool, a decision support solution focused on data-driven and evidence-based treatment transparency, giving coaches access to the same personalized content and data that is accessible to members.

Health Advocate health coaches use Wisier Health to educate employees, prepare them for doctors' appointments and discuss their treatment options. In addition, Health Advocate health coaches will be able to offer member support on health issues and available resources in a timely manner and engage with members before they enter the claims cycle.

The result: employees are guided and supported through the healthcare system in a more comprehensive and personalized manner, leading to better outcomes, lower costs and improved satisfaction. And both the employer and its members will benefit from reduced costs.

By providing Health Advocate health coaches with this powerful clinical decision support tool, members directly benefit from the enhanced integration that exists within RightOpt.

Sincerely,

Scott Rabin  
National Practice Leader, Health Exchange Solutions
