

Working Well: A Global Survey of Workforce Health and Wellbeing Strategies

The 7th edition of Buck's most popular survey, now in its tenth year, expands in focus from wellness to wellbeing.

Traditional employer-sponsored wellness programs focus primarily on physical health, but increasingly seek to help employees improve multiple facets of their lives, including their physical, financial, mental/emotional, social wellbeing and more. Simply put, many employers acknowledge that in order for employees to work well, they need help to live well.

Buck's seventh edition of the Global Wellbeing Survey collects information on a broad range of global wellbeing issues, including:

- Strategy and objectives
- Wellbeing program components
- Financial wellbeing
- Incentive rewards and penalties
- Organizational ownership
- Communication and culture
- Program effectiveness
- Successes and challenges

How to Participate

We invite you to participate in this survey if you are responsible for wellbeing strategy at your company, either globally or at a country-specific level. If wellbeing strategy or programs in your organization vary significantly between countries or regions, we encourage you to respond to the survey separately on behalf of each country. Participants receive a complimentary report.
