

2020 CORPORATE SOCIAL RESPONSIBILITY GOALS AND PROGRESS SUMMARY

PREFACE

For generations, Xerox has stood for innovation, quality and an excellent customer experience. Led by the core values our founder established a half century ago, we conduct business ethically and in an environmentally and socially conscious manner. We are the company that revolutionized the office, created printing-on-demand, and repeatedly reinvented and transformed to keep pace with the demands of our customers and the market.

We set goals, track our progress, communicate and share best practices to improve the quality of work and life, keeping to the core value of corporate citizenship.

Today, we honor this heritage by turning investments in innovation into products and services that help our customers be more productive, profitable and sustainable. We are helping define the future of work and enabling printing beyond paper with new technologies that will disrupt the market and change the way we think about workflows and information processes. This is our contribution to a more sustainable world.

We are proud to present our corporate social responsibility goals and a summary of our progress. Please visit [Xerox.com](https://www.xerox.com) for more information on Xerox Corporate Social Responsibility and reporting in accordance with SASB and TCFD.

CORPORATE SOCIAL RESPONSIBILITY GOALS AND PROGRESS

The 2030 Agenda of the United Nations for Sustainable Development provides a global blueprint for dignity, peace and prosperity for people and the planet, now and in the future. Achieving the **SDGs** requires immediate and accelerated actions by countries along with collaborative partnerships among governments and stakeholders at all levels.

Tech companies, like Xerox, are important stakeholders that can lead by example in their own operations and provide the solutions and countermeasures globally to achieve the goals. Established over a half century ago by founder Joseph C. Wilson, our corporate values have stood the test of time and align with the SDGs. We will continue our efforts to bring our Operations and those of our customers closer to goal.

DIMENSION	SCOPE	GOAL	2019 PROGRESS
Environmental	Operations	100 % landfill avoidance	91.9%
		25 % reduction in energy use by 2025, from 2016	18.7%
		25 % reduction in GHG emissions by 2025, from 2016	35%
		20 % renewable energy use by 2020	15%
		60 % reduction in GHGs (Scope 1 + 2) by 2030 from 2016	35%
		net zero GHGs (Scope 1 and 2) by 2050	127,594 T CO ₂ e _q
		35 % reduction in water use by 2020, from 2010	45%
	Products	100 % landfill avoidance (spent equipment and supplies)	98%
		100 % newly launched, eligible products achieve Energy Star®	100%
		100 % newly launched and eligible products achieve EPEAT®	100%
Social	Workplace Safety	5 % reduction in Total Recordable Injury Rate (TRI) from 2018	13.6 % reduction (US only)
		5 % reduction in Days Away from Work (DAFW) from 2018	28.4 % reduction (US only)

Environmental/ Compliance	Violations and Fines		
	# Notices Received	2 ¹⁸	1 ¹⁹
	Fines Paid [\$ USD]	\$6,500	\$0

Footnotes for Environmental Dimension:

1. Values are for Xerox fleet and facilities globally, unless otherwise noted.
2. Direct emissions from natural gas consumed in boilers for facilities leased and owned by Xerox. Emissions from facilities based on utility invoices, where available. When unavailable, estimates based on Commercial Building Energy Consumption (CBECE) factors. Fuel used in fleet of Sales and Service personnel. Emissions from fleet based on actual fuel usage and vehicle efficiency rates.
3. Indirect emissions from purchased electricity and steam for facilities leased and owned by Xerox. Where data unavailable for office and warehouses in US & Canada, emissions determined using CBECEs factors HFC emissions estimate based on square feet.
4. As defined on the Corporate Value Chain (Scope 3) Accounting and Reporting Standard (WRI/WBCSD).
5. Includes air emissions for Xerox travel worldwide; based on aircraft, load, and miles provided by 3rd party.
6. 2018 value restated to remove volume of chemical erroneously included in calculation last year.
7. Renewable energy and renewable energy credits; not including renewable energy in the grid. This encompasses renewable energy in the Netherlands and RECs from wind in Wilsonville, Oregon.
8. Process waste includes paper, wood pallets, waste toner, plastics and packaging; Manufacturing waste includes scrap metal, batteries, lamps, miscellaneous trash, and end-of-life devices. Non-hazardous waste is either disposed of directly by Xerox or disposal method is designated and confirmed when shipped off-site.
9. Hazardous waste disposed directly by Xerox or a disposal method is designated and confirmed when shipped off-site.
10. Total amount of methylene chloride used to produce Xerox photoreceptor components.
11. 1,3-butadiene air emissions from toner resin manufacturing.
12. Majority of air emissions are from production of supplies such as toner, photoreceptors and fuser rolls.
13. NOx and SOx emissions calculated using emission factors applicable to small boilers from EPA's AP-42, Vol.1, CH1.4: Natural Gas Combustion (<http://www.epa.gov/ttnchie1/ap42/ch01/final/c01s04.pdf>).
14. Measurement methodology updated to remove site discharges from non-Xerox operations.
15. Reverse Osmosis reject water is recycled as make-up water in cooling towers at Xerox's Oregon facility. Volume recycled cannot be accurately estimated with current metering systems.
16. Reportable environmental releases reported in accordance with GRI definition.
17. Values for renewable and non-renewable electricity derived from local grid mixes based on International Energy Association (IEA) data. In 2019, Xerox changed from a location-based calculation to market-based method for scope 2 from electricity.
18. One administrative with no impact to human health or environment; other for discharge exceedance to sanitary sewer.
19. Administrative in nature with no impact to human health or the environment; corrected prior to issuance of NOV letter.
