

10 Tips for a Greener Print Shop

Working together to make every print job a little more green. Here are ten tips to manage your print facility more efficiently:

- Understand your environmental impacts and set goals to reduce them.
- Embrace print on demand.
- Utilize soft proofing.
- Adopt latest workflow technologies.
- Make the most of every sheet.
- Know where your paper comes from and recycle the paper you use.
- Reduce energy use.
- Use good waste prevention and management practices.
- Seek equipment designed for remanufacturing or recycling.
- Ensure you're working with environmentally responsible suppliers.
