Xerox and the Environment: Our Sustainability Commitment

Briefing Paper for Xerox Customers
Sustainability is balancing the social, environmental, and economic needs of business today without compromising the ability of future generations to meet theirs.

At Xerox, we do this by simplifying the way work is done. Sustainability is also about valuing our employees and communities, preserving the environment, and returning value to our shareholders…now and for the future.

**THE TRIPLE BOTTOM LINE AT XEROX**

**Social:** We provide simplified processes that bring cost, quality and productivity benefits, and a greener way of operating. We strive to take a leadership role in local communities as well as in the global community. The volunteer efforts of our employees and the Xerox Foundation supports this work.

**Financial:** Xerox is a profit-making enterprise that creates value for shareholders and strives to be a positive force in the world around us. Our products and services provide cost-effective solutions.

**Environmental:** Our goals focus on areas where we can have the most impact on our own operations and in workplaces, communities, and cities around the world. Achieving these goals means going beyond what we can control directly. We engage our suppliers, customers, employees, and other important stakeholders to extend our reach and magnify our impact.

OUR WAY OF DOING BUSINESS

We have always focused on environmental performance and sustainability - long before it was popular to do so - in order to have a positive effect on our operations, offerings, customers, and communities.

• In the 1980s, we were the first company to introduce power-down features in our equipment to save energy, and the first to make two-sided printing a standard on our systems, to reduce paper waste.

• We were the first in our industry to evaluate the health effects of toner and conclude that there are no issues when used as intended.

• In the 1990s, we pioneered remanufacturing for office equipment and helped shape the EPA's ENERGY STAR® program for imaging equipment. Established in 1991, our Environmental Policy and its principles still guide us today.

• All of our major manufacturing sites certified to ISO 14001 in 1997, within one year of that standard’s development.

We continue to use innovation and leadership to drive environmental performance through our value chain.

• We were among the first technology companies to set a company-wide target for reducing greenhouse gas emissions. In 2012, at the end of our 10-year Energy Challenge program, emissions were cut by 42 percent and energy consumption was reduced by 31 percent. We achieved our 2020 goal - to reduce energy consumption by 20 percent (from a 2012 baseline) in 2016. In 2018, we set a new science-based goal to reduce energy consumption and GHG emissions by 25 percent by 2025 (from a 2016 baseline).

• We were among the first to issue comprehensive environmental requirements to our paper suppliers. In 2006, we began a 10-year partnership with The Nature Conservancy to advance forest management practices and improve sustainable forest management programs.

• The Xerox Sustainability Calculator for Managed Print Services estimates the environmental impacts across the product lifecycle.

• We joined the EPA SmartWay Partnership. Its purpose is to improve fuel efficiency for reduced greenhouse gas emissions and air pollution associated with product transport.

• In 2011, we established corporate short term (2015) and long term (2020) “waste-free” goals.

• We were one of the first companies to have EPEAT-registered imaging products.

• Xerox® ConnectKey® Technology, an award-winning software system embedded in multifunction printers (MFPs) reduces toner and ink spend while reducing wasteful printing through default settings like printing multiple pages on a single page.

• In 2015, The Xerox® Print Awareness Tool, which uses gamification to change print behaviors and engage employees in sustainability efforts, received an Environmental Leader Product & Projects Award.

• In 2018, PrintRelief certification became available to Xerox large enterprise customers in more than 160 countries. The patented PrintRelief technology is the only platform that measures customers’ paper usage and equates the number of trees needed to reforest that usage on an equivalent basis.

RECOGNITION

• Achieved an A on the CDP S&P 500 Climate Report

• Gold Tier participant in the U.S. EPA Sustainable Materials Management (SMM) Electronics Challenge

• Included in Ethisphere Institute’s list of the World’s Most Ethical Companies

• Included in Forbes list of The World’s Most Reputable Companies

• Included in the FTSE4Good Index

• Included in the JUST 100 Rankings of America’s Best Corporate Citizens

• Included in the U.S. Newsweek Green Rankings

• Included on the Euronext Vigeo Eiris Index – World 120

• Ranked on Corporate Responsibility Magazine’s 100 Best Corporate Citizens List; #8 in the Environmental category

• Received a Gold rating from EcoVadis

PARTNERSHIPS

Business Consortiums

• Business Roundtable

• Business for Social Responsibility

• Corporate EcoForum

• EcoPatent Commons

• Responsible Business Alliance

• Responsible Minerals Initiative

• Sustainable Electronics Recycling International R2 Leaders

• The Conference Board, U.S. and Canada

• U.S. CEO Action for Diversity & Inclusion

Non-Governmental Organizations

• Electronic Product Environmental Assessment Tool (EPEAT)

• New York Economic Development Councils

Governmental Organizations

• US. EPA ENERGY STAR

• US. EPA SmartWay Transport Partnership

• US. EPA WasteWise

Our annual Corporate Social Responsibility (CSR) Report provides a comprehensive account of our sustainability efforts while our CSR Goals and Progress Summary provides an overview of our goals and progress.
