What if you could deploy and manage apps across your print fleet automatically?

However your work evolves, apps help you adapt, adding a new dimension of flexibility and functionality to your Xerox® ConnectKey® Technology-enabled Multifunction Printers. Now take that even further with advanced app management.

Introducing Workplace App Management Service. You purchase the apps you need, and we'll deploy and manage those apps across your entire print fleet, ensuring they're always ready and available to users — it's that simple. Our compliance dashboard allows you to see the status of all purchased apps throughout your

print fleet at any time, so you're armed with the information you need to make smarter, faster business decisions. In addition, you'll save precious time that could be better spent on higher-value work.

AUTOMATED PEACE OF MIND

Your IT teams have a lot to manage — ensuring the latest app versions are on the right printers doesn't have to be one of them. Workplace App Management Service does the heavy lifting, so the right people always have the most recent versions of the apps they need when they need them. We offer this solution as part of a holistic, multi-layered security approach. No matter what size your print fleet is, our delivery teams can manage your apps to your established policy.

- **Policies for app distribution**
  App requirements are documented in the Xerox® Device Manager's app policies. Twice yearly reviews of app policies are completed to ensure they're up to date with your specific requirements.

- **Automatic remediation**
  Xerox Device Manager audits your print fleet on a set schedule and automatically corrects app policy or compliance gaps, such as the removal of expired apps and remote remediation of any non-compliant apps.
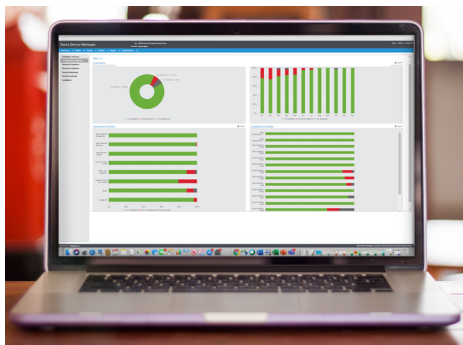

- **Enhanced visibility**
  Intuitive, interactive dashboards make it easy to visualize your compliance standards and app status across your fleet of printers as implemented by Xerox Device Manager.

xerox™

Whether you're an IT manager or an end-user services manager or anything in between, your day leaves little time for easily automated, time-consuming app deployment. and maintenance. Let us do the heavy lifting, so you can focus on what matters most.
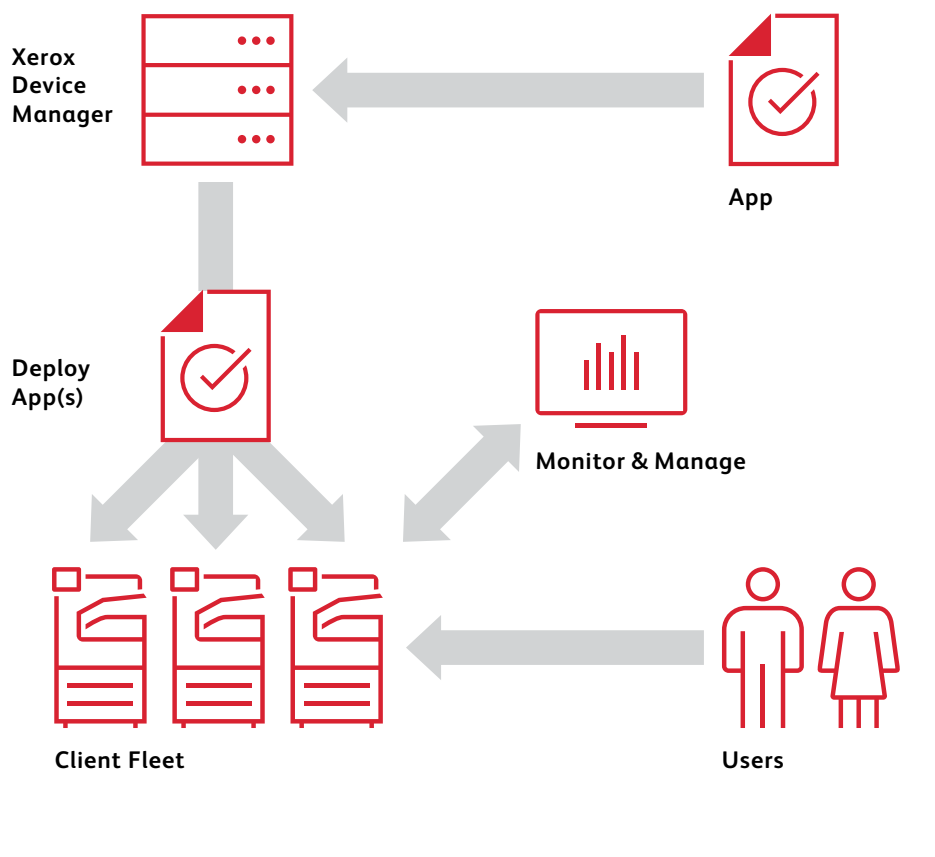

SAVE TIME AND LABOR RESOURCES WHILE IMPROVING PRODUCTIVITY

- **We'll ensure the appropriate apps are deployed to the correct device,** including maintenance according to your specific policies, and deploying apps to devices that get changed back to factory default settings.

- **We'll only deploy apps to the devices outlined in your policy,** so you won't have to pay for apps to be deployed that won't be used.

- **We'll monitor and update apps across your print and device fleet** for bug fixes, security, functionality, user interface and more.

- **We'll help your workforce stay engaged, secure and productive,** keeping apps working, up to date with the latest functionality and security features, and always available.

ADD ANOTHER LAYER OF EASE AND SECURITY TO YOUR ORGANIZATION

Your ConnectKey Technology-enabled Multifunction Printers give you the freedom to work where and how you want to. Go one step further with automated app management to deliver the compliance, security and functionality you need.
