

Xerox® Prime Link C9265/C9275/C9281

1-May-25

The TSL contains paper and specialty media that has been tested by Xerox Media Test Group. All testing is an observation of the performance at the time of the test. It is not a guarantee of future performance.

Internal trays 1/2/3&4 52 gsm - 300 gsm
Tray 5 Bypass 52 gsm - 400 gsm
Trays 6&7 OHCF 52 gsm - 400 gsm

It is recommended that you utilize the alignment tool for registration and skew for each media if you see issues with registration during print production.

Coated media is prone to multi-sheet feeds from the internal trays. It is recommended to use the Oversized High Capacity Stacker for coated media.

Refer to C9265/C9275/C9281 User Guide for best practices when handling media.

Tested Categories & Descriptions

- Runnability**
 - Substrate runs through press without issues
 - Feeding and stacking
 - Front to back registration
 - Shutdowns/Jams
- Ink Adhesion**
 - Toner adhesion side1/side2
- Image Quality**
 - Transfer
 - Mottle
 - Deletions
 - Contamination
