

Everyone says they test their remanufactured cartridges. So why buy Xerox® Replacement Cartridges?

From the first page to the last, in every cartridge, Xerox quality removes the risk. Crisp, vivid prints, maximum printer performance and an affordable price—from the OEM you trust.

Our engineers know cartridges—regardless of who made the printer.

- We invented the printer cartridge—our engineers are relentless about cartridge quality, no matter the printer company.
- We pioneered the process of cartridge performance testing in three different conditions:
 - High Temperature/High Humidity for warmer climates and summer weather
 - Low Temperature/Low Humidity for cooler climates and winter weather
 - Office ambient conditions
- Our yields are at least equal to the OEM's stated yield—but it's not just the number of pages. It's the quality of every image on the page. We test millions of pages for attributes you might not have even thought of:
 - Solid area density
 - Uniformity
 - Ghosting
 - Text haze
 - Color gamut, L A B and Delta E
 - White and dark spots
 - Halftone definition
 - Line reproduction
 - Banding and streaking

We don't just offer the Xerox Total Performance Warranty—we design and test our cartridges to make sure you'll never need it!
